KEY STAKEHOLDERS **WITHIN** CARBON MARKETS

PART 2: PROJECT FUNDERS AND OWNERS

A. Introduction to Project Funders

Project Funders: Introduction

Project Funders are essential in the carbon markets to:-

- provide financial backing to launch and sustain carbon reduction projects
- help accelerate the transition to low-carbon economy

Project Funders: Key Responsibilities

Financing Projects

Providing the necessary capital to start and sustain carbon reduction projects.

Risk Assessment

Evaluating the potential risks associated with the projects to ensure they are viable and have a high chance of success.

Monitoring Progress

Overseeing the development and implementation of projects to ensure they meet their environmental and financial goals.

Project Funders: Who are they?

Private Investors

Venture Capital Firms

International Organisations

Governmental Bodies

Stay tuned for part 2 of my in depth post about types project funders and their impact within the carbon market
